Model OR202 Remote

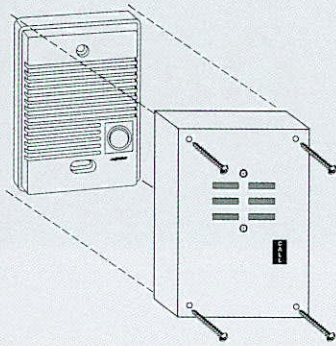

Model SM202 Master

**Model SM202K Shown
in Convenient Blister-Packed Kit**

2-Wire Intercom Kit with Door Release Capabilities

CP202SS Vandal-Resistant Stainless Steel Cover Plate

When a vandal-resistant remote is needed, simply add the Alpha Communications® model **CP202SS** stainless steel cover plate to the existing plastic remote station. Made from 16 gauge high-carbon brush finish stainless steel, with solid metal push-button, these covers are built to last and to minimize vandalism and abuse.

The CP202SS installs right over the existing OR202 (Duo-Com™) remote station and is secured to the wall with vandal-resistant 'Star' head type screws. (Requires a model #8TORX screwdriver tool/tip - not included).

Duo-Com™ Series 2-Wire Intercom Entrance Kit

SS6C 6VDC Power Supply

The SM202K kit can be powered by 4- 'C' batteries or by the addition of the Alpha Communications® model **SS6C** 6VDC plug-in power supply. The SS6C offers a compact, easy-to-install low voltage DC power source for use with the SM202K intercom kit, when batteries are not desired or not practical.

'Duo-Com™'

2-Wire Intercom Kit

The Alpha Communications® SM202K (Duo-Com™) intercom kit is our most economical master/remote intercom for door entry or any other application requiring a single master and a single remote intercom station. The master station has a built-in amplifier and electronic chime. It easily mounts right on the surface of the wall and can directly replace an existing door chime or door bell, on the existing 2-wires! A built-in momentary door release button allows hook-up to your own low voltage door opener (depending upon transformer used). The outdoor remote station is fully enclosed, surface mounts directly on the wall, and requires only 2 wires. The optional PK407A door opener relay allows connection to other voltages and types of door openers.

FEATURES

- Requires only 2-Wires for Intercom and Chime from Remote to Master
- Powers from 4-'C' Batteries or low-cost plug-in adaptor
- Built-in Electric 'Ding-Dong' Chime Signal
- Built-in Momentary Electric Door Release Push-button
- Modern Styling
- Dual Volume Controls for Voice and Chime
