

RY351B

ARCHITECTS' AND ENGINEERS' SPECIFICATIONS

The interface for the Hill-Rom® SideCom® bed controls to Alpha Communications®/Tektone Nurse Call Systems shall be Alpha Communications®/Tektone RY351B or approved equal. The relay shall provide for direct interface to specific Alpha Communications® patient stations.

Wiring between specific Alpha Communications® patient stations and the RY351B shall be mounted on a single gang ring size subplate. The RY351B shall provide a non-resettable "ROUTINE" call at the nurses master station if the bed is unplugged.

Hill-Rom® and SideCom® are registered trademarks of the Hill-Rom Corp.

RY351B Hill-Rom® SideCom® Adaptor

The RY351B SideCom® adaptor is designed for use with the IR311C, IR312C, IR319B and/or IR320B patient stations, and a HILL-ROM® SideCom unit. When used with the above patient stations and the HILL-ROM® SideCom® unit the RY351B adaptor will provide all the necessary circuitry for a HILL-ROM® SideCom® unit to control all functions normally controlled by a pillow speaker. This includes but is not limited to nurse call and patient communications. **Note:** There is one RY351B SideCom® adaptor required per SideCom® unit.

FEATURES

- Provides for the following functions from a Hill-Rom® SideCom® unit:
 - Call-placed indication
 - Monitor indication
 - Hands-free two-way communication
 - Nurse Call
- Fully supervised
- Ramp lock plug-in connectors

SPECIFICATIONS

- Dimensions:** Height: 1.25" (31.8mm)
Width: 2.00" (50.8mm)
Length: 4.25" (108mm)
- Construction:** Circuit board mounted on a rugged aluminum mounting bracket.
- Connections:** Reliable ramp lock plug-ins.

NOTE: The RY351B comes with one (1) dummy plug (for the IR311C or IR312C only) and requires a model PL301 blank plate and IH358 electrical box with IH357 plaster ring. It is used with the Hill-Rom® #P376 Wall Plate adaptor unit (provided by Hill-Rom). When used with the IR319B or IR320B patient station, you require one or two separate JK401 dummy plgs, respectively.
