IR087A Oversized Apartment Intercom Stations

The Alpha Communications® IR087A apartment stations are designed specifically for renovation use and are large enough to cover the area occupied by most existing intercom units, making repainting unnecessary. The reduced wiring requirement permits using the existing wiring (if in good condition), while the advanced electronic design permits use in large or small buildings. A wide variety of optional accessories is available to provide additional functions such as dual entrance operation, post office door release, silent door operation, etc. Stations are also available in custom designs.

FEATURES

- Simple push button operation
- Automatic Privacy
- Easy Installation
- Large panel faceplate covers most openings
- Attractive Steel Faceplate with White Vinyl Coat Finish

SPECIFICATIONS

- Dimensions:** Height: 8.75" (222mm)
Width: 6.50" (165mm)
- Construction:** Steel faceplate with white vinyl coat
- Controls:** Individually replaceable push buttons with self wiping contacts. Identified for TALK, LISTEN, and DOOR functions.
- Speaker/Mic:** 3.50" (89mm) with voice response. Also used for electrical tone signal.
- Mounting:** Mounting holes may be positioned to accommodate an existing back-box. Supplied without holes or mounting screws unless custom ordered.

SYSTEM OPERATION

The caller, by pressing the appropriate button on the entrance panel, causes an electronic call tone to be sounded in the apartment station being called. The resident may then determine the identity of the caller and permit entry to the building, if so desired, by operating the apartment station as follows:

- | | |
|----------------------|---------------------------------|
| TALK button | Push while speaking to caller |
| LISTEN button | Push while listening for reply |
| DOOR button | Push to allow entry to building |
