Rev. 1 - 07/1999

TA205B

ARCHITECTS' AND ENGINEERS' SPECIFICATIONS

The telephone handset intercom station shall be Alpha Communications®/Tektone model TA205B or approved equivalent and shall be molded of durable, high-impact ABS (white) plastic. Dynamic speech elements shall be used.

The phone shall be able to mount on a standard, single gang electrical box (or plaster ring) and shall have screw terminals for wiring hookup. A button shall be provided for door lock release. The TA205B shall require four (4) common and one (1) selective wire, to perform intercom and door opening functions. Signaling to handset shall be done with a pleasant electronic tone signal.

Contractor shall furnish and install the model PK205 system amplifier and any related components as required for proper system operation.

Contractor shall install as per manufacturers instructions and shall observe all local and national electrical and building codes.

TA205B Telephone Handset Intercom Station

The Alpha Communications® TA205B handset telephone is designed especially for intercom use and features compact modern styling and advanced electronic design using dynamic speech elements and a reliable hook cradle switch. The TA205B is molded of high-impact flame retardant type ABS plastic and suitable for a variety of applications.

The TA205B easily mounts right on the surface of the wall, or over a single gang electrical back box or plaster ring.

FEATURES

- Clear, true voice reproduction
- Easy to install and use
- Pleasant Audio Tone Signal
- Built-In Door Release Button
