ARCHITECTS' AND ENGINEERS' SPECIFICATIONS

Vertical mail boxes shall be Alpha Communications®/Florence 630 (or P630 with pushbuttons) series, or approved equal. Mail boxes (and all related accessories) shall be finished in Natural Anodized Aluminum (or Gold Anodized Aluminum). Contractor shall provide any key keepers, and/or alphabetical directories, as required for a proper installation, in a matching finish to the mail boxes. Mail boxes shall be (single or double) row mounted, and each compartment shall be provided with a 5-pin cylinder lock, with 2 keys per lock.

Customer understands that these mail boxes are **NOT U.S. Postal Approved** and any use of these boxes shall be at the full risk of the customer. These boxes are designed to replace old style mail boxes where the job-site conditions don't have sufficient space for the newer postal approved type mail boxes.

Contractor shall install as per manufacturers instructions and shall observe all local and national electrical and building codes, as well as all USPS regulations.

630 Series Vertical Style Mail Boxes (NON-POSTAL APPROVED)

The Alpha Communications® 630 series vertical style mail boxes is for replacement use only, primarily in buildings with size constraints. They come in configurations from three (3) to ten (10) compartments in each mail box. Choose from standard finishes of Natural Anodized Aluminum or Gold Anodized Aluminum.

Customer understands that these mail boxes are **NOT U.S. Postal Approved** and any use of these boxes shall be at the full risk of the customer. These boxes are designed to replace old style mail boxes where the job-site conditions don't have sufficient space for the newer postal approved type mail boxes.
