

**SM401
Master**

**SM401TS
Master
with Tone/Buzzer
On/Off
Toggle Switch**

ARCHITECTS' AND ENGINEERS' SPECIFICATIONS

The master station(s) shall be Alpha Communications®/Tek-tone® (SM401 or SM401TS) equipped with momentary-action push buttons for TALK, CALL, and DOOR operation. Each push button will have English or symbol function label. The PRIVACY and STATION selection function shall be controlled by a latching push button. MUSIC and VOICE shall be individually adjustable by means of a sliding control; accessible from the front face of the unit.

The SM401TS shall have all the same features as the SM401, with the addition of a tone (buzzer) call On/Off toggle switch installed.

Dip switches shall be provided to selectively enable or disable call tone, all-call reception, selector LED time-out, CALL pre-announce tone, ALL-CALL pre-announce tone as well as call-tone type selection - either chime or buzz tone.

The station shall be molded of high-impact ABS plastic and have connections provided by plug-in pigtail connectors, which shall be supplied with the unit.

SM401 - SM401TS 1- Call Master Stations

The SM401 and SM401TS master stations combine modern styling with ease of voice operation to provide natural, clear voice communication along with positive door release operation. Each button has labels or symbols explaining its function. Advanced circuitry and versatility permit the unit to call to the other unit in the system as well as receive calls from other masters.

The SM401 master station allows calling to a single master and/or remote station, with or without electric door release capability.

The SM401TS master is the same as the SM401, with the addition of a tone (buzzer) call ON/OFF toggle switch installed. The SM401TS is normally used in New York City Housing Authority applications. Both masters can be intermixed with any of the other SM404, SM406 and/or SM411 series master stations.

FEATURES

- Simple push button operation to call to a single master or remote station
- Easy Installation
- Advanced design
- Selectable privacy
- Clear voice fidelity
- Precision engineering
- All-call (paging) (optional)
- Background music available (optional)
- Surface or Desk mounting
