IH352 thru IH358 Series Back Boxes and Plaster Rings

The IH352 thru IH358 series electrical boxes and plaster rings (a.k.a. raised covers) are used primarily with our microprocessor and microcontroller nurse-call and emergency-call systems.

These extra deep boxes allow for proper p.c. board and component clearance, and minimize wire congestion and possibilities of static discharge.

All models are made by STEEL CITY, now a division of Thomas and Betts Corp. and our model numbers are shown with a cross-reference to the Steel City model numbers/series.

NOTE: Use of any other type of non-approved box and/or ring, may void our factory warranty.

MODELS AVAILABLE

Our Model#	Steel City Model#	Height	Width	Depth*
IH352	3GC	4.50"	8.25"	0.75"
		(115mm)	x (210mm)	x (20mm)
IH353	H3BD	4.50"	8.25"	2.50"
		(115mm)	x (210mm)	x (64mm)
IH355	2GC	4.50"	4.50"	0.75"
		(115mm)	x (115mm)	x (20mm)
IH356	H2BD	4.50"	4.50"	2.50"
		(115mm)	x (115mm)	x (64mm)
IH357	52C14	4.00"	4.00"	0.75"
		(102mm)	x (102mm)	x (20mm)
IH358	52171	4.00"	4.00"	2.125"
		(102mm)	x (102mm)	x (54mm)

*Depth indicates depth of back box (behind sheetrocked wall) or depth of plaster ring (on top of electrical box).

Due to continuous product improvement, all colors, sizes, materials, finishes and specifications are subject to change without notice.
