

Product Specification Sheet

APS351

Rev. 1 - 07/1999

**D3003A (120 name)
Aluminum Directory (shown)**

ARCHITECTS' AND ENGINEERS' SPECIFICATIONS

The alphabetical directory unit(s) shall be Alpha Communications®/Florence D300x (striated) or D400x (smooth) or approved equal (x=number of directory modules). Directory unit(s) shall be made of heavy gauge extruded aluminum in (Natural Anodized, Gold Anodized or Duranodic) finish.

The D300 series shall be used with the 1250 series vertical mail boxes and the D400 series shall be used with the 1400 and 1500 series horizontal mail boxes.

Where required, contractor shall provide the required 'FDS' engraved directory strips and sufficient 'FDS-B' directory blanks, for each directory.

No special screwdriver or tool shall be required for future directory name maintenance.

D300 Series (striated) D400 Series (smooth) Alphabetical Directory Units

The Alpha Communications® D300 (striated) and D400 (smooth) series alphabetical directory units are made of heavy gauge extruded aluminum, and are available in 5 sizes.

The D300 series has a striated finish, and is designed to be used with the 1250 series vertical mail boxes. The D400 series has a smooth finish, and is designed to be used with the 1400 and 1500 series horizontal mail boxes.

The 19.125" height on the D300 (striated) series is ideal for mounting alongside standard 1250 series 19.125" high vertical mail boxes, if required.

Alphabetical directories are required by the USPS, when there are 15 or more mail receiving tenants in a building.
