

SF311G Single Cord

ARCHITECTS' AND ENGINEERS' SPECIFICATIONS

The call cord(s) shall be Alpha Communications®/ Tektone model SF311G or approved equal. Model SF311G shall include a single squeeze bulb for call origination, to a single 8-pin (RJ45 type) plug connector.

The Call Cord(s) shall permit simple call origination and shall be acceptable for use in oxygen, geriatric or general applications.

The momentary contact, air operated switch shall be built into the plug and shall be activated by light pressure to the squeeze bulb. A 6' long vinyl tube shall connect the squeeze bulb to the stainless steel plug. A stainless steel bed clamp shall be permanently affixed to the call cord but shall be adjusted along the length of the cord.

The SF311G shall be UL 1069 listed to the latest 4th Edition standards.

SF311G Single Geriatric Call Cords

The Alpha Communications® SF311G 'Geriatric' call cords are for use with various model patient stations in Alpha Communications®'s nurse call systems, including the model IR157N, IR257, IR258, IR311B, IR311C, IR312B and IR312C stations.

The call cord plug is inserted into the 8-pin (RJ45) receptacle located on the patient station, providing for call placement to the system master station. SF311G call cords are specifically designed for use in geriatric and oxygen environments but may be used in general applications also.

To place a call, the patient need only apply slight pressure to the squeeze bulb using any body part. The force of air through the vinyl tubing closes a switch in the plug, thus placing a call.

An adjustable bed clip is supplied for the SF311G attached to each call cord.

FEATURES

- Sensitive touch activation
- Oxygen tent safe
- Ideal for geriatric use
- Momentary, air-activated switch
- Adjusted bed clip(s)
- U.L. 1069 listed

SPECIFICATIONS

Switch:	Momentary contact, air activated
Plug:	Stainless steel
Cord:	Vinyl tubing
Electrical:	Rated current 1/3 amp, 24 VAC-VDC
Dimensions:	Cord - 6' long Plug - 1.25" long Bulb - 1.50" diameter
