Crown Jewel Telephone Entry Systems

The Alpha Communications® Crown Jewel Series is a 'No Phone Bill' Telephone Entry System for single family residences or businesses. It connects directly into the existing telephone line in the house. The Crown Jewel is a stand-alone system, available in a choice of 5 different finishes, as well as options such as built-in B&W camera, and pedestal mounting. Each Crown Jewel unit has a sidelit keypad for easy viewing at night.

FEATURES

- Can be used with either rotary or touch-tone service
- 'No Phone Bill' Type Operation
- Choose from Polished Brass or Stainless Steel models
- 2 Control Relays (requires touch-tone service for 2nd relay)
- 75 Time/Date Restricted Entry Codes
- Call-Waiting / Call-Forwarding / Remote Programming
- Battery-backed 365 Day Clock
- Distinctive Ringing to distinguish from regular phone call

NOTES: Contractor to provide the required phone jack(s). May be required to be provided by the local phone co. When using the built-in B&W camera option, customer shall provide the compatible video monitoring equipment needed, and separate wiring required.

Due to continuous product improvement, all colors, sizes, materials, finishes and specifications are subject to change without notice.

ARCHITECTS' AND ENGINEERS' SPECIFICATIONS

The telephone entry system shall be the Alpha Communications®/Sentex Crown Jewel or approved equal. The Crown Jewel master station shall be finished in (select from the 5 finishes shown). Unit shall be surface mount type and shall have sidelit keypad for better viewing at night. Unit shall feature 75 Time/Date restricted Entry Codes, 2 Control Relays, Call-Waiting, Call-Forwarding, Remote Programming, Distinctive Ringing (to distinguish from regular phone call) and Battery-Backed 365 Day Clock. The Crown Jewel can be used with either rotary or touch-tone service.

The contractor shall provide the required components for a complete 'No Phone Bill' type system, including the required phone jack(s) (from the local phone co.).

Where required, the contractor shall furnish and install the built-in B&W camera option (CJ-CAMO), gate pedestal (CJ-PED) and any other optional components required.

Contractor shall observe all local and national electrical codes.
