

LA-HS (model shown)

ARCHITECTS' AND ENGINEERS' SPECIFICATIONS

The telephone entry system shall be the Alpha Communications®/Sentex Landmark or approved equal. The Landmark master station shall be finished in Stainless Steel faceplate with a painted enclosure. Unit shall be surface mount type and shall have a built-in handset with armored cord and lighted keypad for better viewing at night. Unit shall feature 50 Entry Codes, 2 Control Relays, Call-Waiting, and Distinctive Ringing (to distinguish from regular phone call). The Landmark can be used with either rotary or touch-tone service.

The contractor shall provide the required components for a complete 'No Phone Bill' type system, including the required phone jack(s) (from the local phone co.).

Where required the contractor shall furnish and install the gate pedestal (LA-PED) and any other optional components required.

Contractor shall observe all local and national electrical codes.

Landmark Telephone Entry Systems

The Alpha Communications® Landmark Series is a 'No Phone Bill' Telephone Entry System for single family residences or businesses, when a handset type 'privacy' station is required. It connects directly into the existing telephone line in the house. The Landmark is a stand-alone system, finished in a Stainless Steel faceplate with a painted enclosure and lighted for easy viewing at night. An optional pedestal mounting post is available for gated entries.
