

**IR150B**

### ARCHITECTS' AND ENGINEERS' SPECIFICATIONS

Staff station(s) shall be Alpha Communications®/Tektone IR150B or approved equal. Station features shall include solid state call placed and intercom in-use indicators, call button, cancel button, and 2.50" speaker/microphone with voice response. All functions shall be provided by solid state circuitry mounted on a printed circuit board. The station shall utilize a 2.50" x 2.50" speaker/microphone for accurate voice reproduction.

All station components shall be mounted on an attractive flame retardant ABS plastic panel, in fog white color. Connections shall be plug-in type.

Contractor shall observe all local and national electrical and building codes.

The IR150B shall be UL 1069 to the latest 4th Edition Standards.

### IR150B Staff Station

The Alpha Communications® IR150 Staff Station may be used to provide communication between the Nurse Call Master Control Station and utility or examination rooms, kitchen, or any location needed.

A call button is provided to initiate calls and a reset button to cancel calls. A solid state call-placed indicator provides call assurance. A sensitive speaker microphone permits hands-free communication. The reliable solid state circuitry is mounted on a rugged ABS plastic faceplate in a light texture, fog white color.

#### FEATURES

- Push button calling
- Call reset push button
- Intercom indicator lights when room is monitored
- Sensitive speaker/microphone
- Solid state circuitry
- Attractive flame retardant ABS plastic faceplate
