

VT420C Module

**ARCHITECTS' AND ENGINEERS'
SPECIFICATIONS**

The entrance video-intercom panel module(s) shall be Alpha Communications® VT420C series. It shall contain as many engraved plungers as there are suites or areas to be called using the CM490 series add-on button modules. AM190D directory panels are to be supplied to accommodate an equivalent number of tenant names.

Each module shall include a weather-resistant speaker/microphone mounted behind louvered grilles and perforated aluminum material to protect them from damage. Each module shall contain a built-in 'MOVING' camera in Color (VT420C), protected by a domed polycarbonate window.

All mounting screws shall be tamper resistant. The panel shall be flush (or surface) mounted and shall be finished in natural anodized aluminum. Contractor shall supply building owner/manager with a model S1 screwdriver for future directory name maintenance.

**VT420C Apartment
Video-Intercom Entrance
Panel Modules With
'MOVING' Color Camera**

The Alpha Communications® VT420C (Color) Series Apt. Video-Intercom Entrance Panel modules are designed to be used with the CM490 series button modules and AM190D directory modules, to provide a complete building video-intercom entrance panel.

Both modules are equipped with model TE-TT voice-frequency response speaker and electret condenser microphone, both protected by a louvered grill and perforated aluminum material. The VT420C models have a built-in Color 'MOVING' camera, both with a protective domed polycarbonate enclosure.

The VT420C is normally used with the VHC25MS series video-intercom monitors, or equivalent.

FEATURES

- Built-in 'MOVING' Color camera with protective domed enclosure
- Weather-resistant speaker and electret microphone
- Hands-free loud-speaker (or optional handset)
- Tamper resistant mounting screws (on panel frame)
