DO-001A Electric Door Strike Mortise Type - Reversible with Adjustable Latch

The Alpha Communications® DO-001A **MightySlim™** electric door strike is our lowest cost mortise type door strike. It is designed to be used primarily in wooden door frames. Under certain circumstances, the DO-001A can be used in hollow aluminum and hollow metal door frames.

The DO-001A **MightySlim™** can be used in right-handed or left-handed installations, simply by turning the door strike upside down, during installation.

When used with an 14-24VAC input, the DO-001A makes a buzzing sound, when activated. When used with a 14-24VDC input, the DO-001A activates silently.

Our unique screw-adjustable latch mechanism makes lock tongue alignment quick and easy. The ultra-slim 1.125" (28.5mm) deep body makes the DO-001A one of the easiest and quickest door strikes to install.
