Contractor shall observe all local and national electrical and building codes.

EMDB1 Series Keypad Module for Modular Series Door Stations

The EMDB1 series keypad modules are designed to be used with Alpha Communications®/S.T.R.™ modular series door entry stations. When used in conjunction with the DB1 series display module, the EMDB1 enables a building visitor to easily find and dial an apartment code number.

All EMDB1 keypad modules feature LED illumination and plug-in connector for easy wiring.

Each system utilizing the EMDB1 keypad module requires a model BRA receiver board, model BRK16 16-station selector relay(s) and the associates NTR211 and NTR201 power supplies.

All EMDB1 keypad modules and are available in three (3) finishes; Titanium (suffix-T), White (suffix-W) or Brown (suffix-B).

All EMDB1 keypad modules are 3.94" w x 3.94" h (100mm x 100mm), and are made to snap into the MT series modular panel trim frame(s).

To service the EMDB1 series display modules, once installed, use the model 13510 key / tool unit.

Due to continuous product improvement, all colors, sizes, materials, finishes and specifications are subject to change without notice.
