The pillow speaker case shall be constructed of ABS Flame retardant plastic. All momentary contact SPST 10 AMP switches shall be rated for over 1,000,000 operations. The pillow speaker cord shall be an 8 conductor cable and shall have an 8-pin 'DIN' plug. The cord shall also be provided with stain relief. Each pillow speaker shall be provided with a wall hanger, a security/bed clip and its own individual plastic bag.

Controls shall be provided for entertainment, audio, intercom, nurse calling and channel selection of television, and shall be marked , TV respectively.

The pillow speaker shall be Electro-Static-Discharge protected to over 20,000 volts. The pillow speaker(s) shall be UL 1069 listed to the latest 4th Edition standards.

SF401P Pillow Speakers

The Alpha Communications® SF401P pillow speaker are used primarily with the IR319B/IR320B room stations for the NC300 and/or NC300II series microprocessor nurse-call system.

The SF401P provides for call placement to the system station master(s) and for TV controls. Simple operation is provided by momentary switches.

To call a nurse simply press the pushbutton indicated "  ". Separate controls are provided for TV ON/OFF and channel selection. TV sound is automatically silenced while the intercom is in use (at the patient station).

FEATURES

- UL 1069 Listed - 4th Edition standards
- 2.25" (57mm) Mylar cone speaker
- ABS flame-retardant plastic
- SPST 10 AMP switches - rated for over 1 million operations
- ESD protected over 20,000 volts
- Hanger and security/bed clip provided
- Standard 8-pin 'DIN' plug
- Volume control conveniently located on the unit's side

NOTE: when using the IR319B and/or IR320B type patient stations and no pillow speaker functions are required, please substitute the SF401P pillow speaker with the SF401 call cord. The SF401 simply provides a nurse call button and no TV controls.
