**DPH100W
Wall/Desk Phone with
RED Indicator Lamp Bar**

The Alpha Communications® DPH100W telephones are designed to work as an apartment type telephone intercom station, in conjunction with a telephone entry type intercom system, or for other similar applications.

The DPH100W telephones are ideal for use as **"Dummy Phones"** on "No-Phone-Bill" type telephone entry intercom systems, where the apartment tenant does not have a telephone connected to the phone company lines or phone service, or as Concierge telephones for use with our AlphaEntry™ type intercom systems.

These stylish phones easily surface mount on the wall or on a table or desktop. The Lighted Keypad allows its use in dark rooms or at night.

The high-intensity **Flashing RED Indicator Lamp Bar** makes the DPH100W telephone a perfect solution for hearing-impaired tenants, who cannot hear the normal electronic ringer.
