

SF001JC

ARCHITECTS' AND ENGINEERS' SPECIFICATIONS

The visual single patient station(s) shall be Alpha Communications® SF001JC, or approved equal and shall include a jack for the required model SF301/8 (single) call-cords or model SF302 (double) call-cords (or other specialty type cords as required).

The station shall be mounted into a standard single gang electrical box (or ring). Pigtail wiring shall be provided for call-placed and cord-out connections. Faceplate shall be White plastic (with matching screws provided).

Contractor shall observe all local and national electrical and building codes.

SF001JC Wall Jack Station

The Alpha Communications® SF001JC visual patient station includes a jack for the insertion of a model SF301/8 (single) or SF302 (dual) call cord set (or equivalent).

The SF001JC has a conventional 1/4" 'phono' type jack and accepts a variety of plug-in type call cords and/or devices. The SF001JC features a White Plastic faceplate, and mounts on a single gang electric box or plaster ring.

It also provides for a 'cord-out' indication, when used with the AlphaEntry™/QwikBUS™ type systems (or equivalent).

FEATURES

- White Plastic Faceplate
- Standard 1/4" Phono Jack with 'cord-out' indication
