ES0 Series Compact Surface Apartment Intercom System Speaker Entrance Panels

The ES0 Series entrance panel is a compact style for use with Alpha Communications® loudspeaker type apartment/suite stations. They are our most economical and most compact surface mount entrance panel stations, for 1 to 4 pushbuttons.

Panels are equipped with a high quality voice speaker mounted behind a weather-resistant plastic membrane.

These compact panels are only 3.25"W (83mm) x 6.875"H (175mm) and 1.375"D (35mm).

In addition, the individual pushbutton switches also serve as resident name holders. The pushbuttons may be illuminated for nighttime use, with the addition of the optional model# 10530 lamp inserts (1 per pushbutton), which may require separate power, depending on the system being used.

ARCHITECTS' AND ENGINEERS' SPECIFICATIONS

The compact surface mount entrance panel(s) shall be Alpha Communications® ES0 series or approved equal, and shall provide for 1 to 4 push buttons per speaker panel.

The panel(s) shall include a high quality voice speaker mounted behind a weather-resistant plastic membrane. Push button switches shall be individually replaceable type, with self wiping contacts. In addition, the individual pushbutton switches shall also serve as resident name holders. The pushbuttons may be illuminated for nighttime use, with the addition of the optional model# 10530 lamp inserts (1 per pushbutton), which may require separate power, depending on the system being used.

The ES0 panel(s) shall feature a 2mm thick natural anodized aluminum front faceplate, and built-in high impact plastic surface mount enclosure with integral rainhood. The ES0 compact panel(s) shall protrude from the finished wall surface a maximum of 1.3875" (35mm), and shall be only 3.25" wide (83mm), making them perfect for narrow doorframe installations.

Contractor shall observe all local and national electrical and building codes.
