

**EL560
Twisted Pair
Video Transmitter**

ARCHITECTS' AND ENGINEERS' SPECIFICATIONS

The Twisted Pair Video Transmitter(s) shall be Alpha Communications®/Golmar EL560, or approved equal. EL560 shall be mounted inside the appropriate video door entry station.

Unit(s) shall be used to convert the conventional twisted pair video signal to a digital video signal, the video-intercom system can recognize and process.

The EL560 module(s) shall have positive screw terminal and plug-in connectors.

Contractor shall observe all local and national electrical and building codes.

EL560 Twisted Pair Video Transmitter

The Alpha Communications®/Golmar EL560 Twisted Pair Video Transmitter is a compact, assembly that mounts into a variety of video door entry stations, in order to convert the conventional twisted pair video signal, to a digital video signal.

Typically, the EL560 mounts behind the video door entry station, near where the camera module is located.

FEATURES

- Compact design mounts behind video door entry station
- Positive screw terminal and plug-in connectors
- Works with a variety of video door entry stations
