

**RCPL Series
Wall Mount Connector
(model RCPL-PLUS shown)**

ARCHITECTS' AND ENGINEERS' SPECIFICATIONS

The Wall Mount Connector(s) shall be Alpha®/Golmar RCPL series, and shall be used with the Alpha®/Golmar Platea series video-intercom monitors.

Wall mount connector(s) shall have slotted screw mounting holes to provide a level wall alignment.

Wall mount connector(s) shall have positive screw terminal connectors.

Wall mount connector(s) shall include a hinged mounting assembly for positive video-intercom station alignment and mounting.

Contractor shall install as per manufacturers instructions, and shall observe all local and national electrical codes.

RCPL Series Wall Mount Connectors

The Alpha Communications®/Golmar RCPL series wall mount connectors are designed to work with the Platea series video-intercom monitor stations, to allow them to mount directly onto the surface of the wall.

NOTE: Please choose the correct RCPL unit depending on the Platea model being used.

All RCPL series wall mount connectors feature slotted mounting screw holes to guarantee a level mounting alignment, as well as positive screw terminal connectors and a hinged mounting assembly for positive station alignment and mounting.

FEATURES

- Easy surface wall mount installation
- Has slotted screw openings for level wall alignment
- Positive screw terminal connectors
