

Lobby Directory Display Software

AlphaLobby™ Features

AlphaLobby™ is a brand new, and innovative approach to building lobby name directory displays. Using a simple PC (running 32-Bit Windows® software), a touch-screen display monitor, and AlphaLobby™ software, you can easily display all of the names of your building residents in an easy to read graphical format.

AlphaLobby™ is packed with features and is adaptable to fit virtually any facility, institution, office building, or multi-residential application.

AlphaLobby™ works with any size building, and can display virtually any number of building resident names.

Typical Applications:

- Multi-Residential (Apartment House) buildings
- Commercial/Office buildings
- Hospitals
- Nursing Homes
- Houses of Worship
- Courthouses
- Schools
- Sporting Arenas
- Internal/Office
- Banks
- and many others.....

Unlimited Name Capacity: AlphaLobby™ allows you to have virtually any number of building resident names display, in a convenient scrolling display.

Jump To Letter: Large A-Z buttons allow a building visitor to 'jump' to the letter of the resident's name quickly and easily, without having to scroll thru dozens or hundreds of names.

Scrolling Buttons: Large UP and DOWN ARROW buttons allow a building visitor to scroll UP or DOWN to quickly find the name they need.

Graphical Display: AlphaLobby™ lets you decide what opening graphic is seen when a visitor first enters the building. All you need to do is save an 800 pixel wide x 600 pixel high graphic to the correct folder on the PC, and it will display automatically as the default welcome screen.

Welcome Screen Slideshow: AlphaLobby™ lets you save several graphics as 'rotating' welcome screens and you can have them automatically become a slide show display. You can even set the duration (in seconds) between image changes. AlphaLobby™ does the rest.

Holiday Graphics: During holiday seasons, AlphaLobby™ can automatically display holiday graphic welcome screens in place of the standard graphics, to cheer up your lobby and make it more festive.

Quick Name Change: Quickly and easily add and/or delete resident names from the database, using a standard PC keyboard, and AlphaLobby™ will automatically re-alphabetize them instantly. No more engraved nameplates, or problems with mis-spelled names!

Password Protection: Optionally, AlphaLobby™ lets you set a password that will only allow authorized persons to change names and/or system functions.

No Recurring Charges: Once you pay for the AlphaLobby™ software for your building, there are no monthly or recurring charges. Each building pays a one-time fee for that version of AlphaLobby™.

Monitor Choices: AlphaLobby™ can be used with virtually any size compatible touch-screen monitor, so you can choose the size that best fits your building lobby. You can even use a touch-screen monitor built into a kiosk or pedestal stand (provided by others), to match or enhance your lobby's decor.
