Emergency Response Systems

## Go GREEN with Cornell's new Photoluminescent Area of Rescue Assistance/Area of Refuge Signs

Normal View

Total Darkness View

**Part # SN-LM42S**  
Single Sided  
**Part #SN-LM42D**  
Double Sided

**Part # SN-LM42SR**  
Single Sided  
**Part #SN-LM42DR**  
Double Sided

**Mounting Options include Ceiling (top), Wall (flat), Wall (flag)**  
**Signs have solid line and arrow of direction is provided to be placed when installed**

Cornell's newly released ARA Signs utilize photoluminescent technology. Photoluminescent materials absorb and store energy from normal ambient light and are designed to glow in total darkness; it then releases this energy in the form of light during an emergency. Reliability has been an inherent problem with conventional emergency exit signs due to maintenance issues and bulb failure. The big advantage of Cornell's ARA signs is that there are no internal lights to burn out making it almost 100% reliable and virtually maintenance free.

Since Cornell's photoluminescent ARA Signs are NON-ELECTRIC, our signs can be installed in almost any location, high and low, not worrying about expensive electrical installations. Simply follow local building and fire codes for location requirements, check to see that there is 54 LUX of fluorescent light on the sign face at all times during building occupancy, and then hang your Cornell photoluminescent ARA Sign.

Cornell's photoluminescent ARA Signs are in compliance to NFPA Life Safety Code 101 and all national building codes, ICBO, IBC, BOCA, SBCCI, NFPA 5000.

**NO** electricity to operate  
**NO** wiring to run  
**NO** bulbs or batteries to replace

**NO** toxic/radioactive materials  
**NO** maintenance for 25+ years  
**NO** problems with safe disposal

The brighter the ambient light intensity (lux) of fluorescent light on the sign face, the shorter the amount of time it takes to charge the exit sign. The current UL 924 Standard requires that there be 54 lux of fluorescent light on the sign face at all times during building occupancy.
